---

---

### Skills

- HTML, CSS
- Javascript, Typescript
- NodeJS, Express
- React, Redux
- SQL
- Git
- API design knowledge
- Object Oriented design

---

### Experience

---

### Profile

Highly motivated developer with love for problem solving seeking to launch a career in what I am most passionate about - building web applications. Through my studies at Business College Helsinki and through personal projects I have hands-on experience developing and deploying applications with javascript centric tech stacks.

---

---

#### Are You Bored? / HTML/CSS/JS

A group project that implemented several public APIs such as Soptify, Omdb, New York Times. I Worked on UX/UI and fetching data from the APIs. Learned how to effectively use git as a group.

#### Group project 2 / React/NodeJS

A social media app where I was responsible for the frontend. I mostly worked on React components and implemented HERE maps API to show locations that were stored in the database.

#### Interactive CV / HTML/CSS/JS

An interactive game like CV with navigation control and sounds. I used an object oriented approach.

#### Covid 19 Tracker/ React

Covid tracking app fetching data from API by country. Input field gives suggestions for matching countries while typing.
